

Weekly Planner

Oct 2026 - Jun 2030 | Calgary - Beijing

One week per page. Header shows the week, phase, term and location.

Top list - this week's academic, financial and technical check-offs.

Habit grid - a tick box per habit per day. **Each row states the daily minimum you must hit to tick it.** Shaded = not scheduled that day.

DAY DONE - one box per day; tick it when every scheduled habit is done.

Notes - blank lines at the foot of each page.

Daily minimums - a tick means this much

Habit	Min. to tick (typical week)	What counts
Violin	45 min daily	timer on; scales + technique + repertoire.
BJJ	>=90 min	full class, >=90 min on the mat incl. 1 live round.
Swim	>=75 min	>=75 min; log the set distance.
Yoga	>=60 min	>=60 min session (flow or recovery).
LeetCode	>=60 min daily	>=60 min: 1 new problem + 1 review, submitted/accepted.
Project	2.5 h/wknd	2.5 h across the weekend; a real commit pushed to GitHub.
Personal	>=1 h daily	protected rest/human time actually taken (no study, no tech).

Minimums scale with the phase: in co-op/internship terms (Phase 6 & 8) training and LeetCode blocks are smaller because the work week is full-time. The exact figure for every week is printed on that week's row.

Dates are planning targets. Confirm real deadlines at the source (UCalgary, Student Aid, co-op, exchange) before you act on them.

Legend - what counts as a tick

Tick a box only when that row's daily minimum is met. Shaded cell = not scheduled that day. **DAY DONE** = every scheduled habit ticked today.

- Violin 45 min - timer on; scales + technique + repertoire.
- BJJ - full class, >=90 min on the mat incl. 1 live round.
- Swim - >=75 min; log the set distance.
- Yoga - >=60 min session (flow or recovery).
- LeetCode - >=70 min: 1 new problem + 1 review, submitted/accepted.
- Project - 5 h across the weekend; a real commit pushed to GitHub.
- Personal - protected rest/human time actually taken (no study, no tech).
